Forecast for Sunday 11 Jun 2023

Weather: A fine and dry morning with variable amounts of mid-level cloud. Some light winds, feeling warm but very pleasant at height. Some scattered showers will develop from the south during the afternoon. While the east of the park is expected to remain dry or see only small amounts of rainfall, some of the showers in the west will be torrential, with hail and strong winds as additional hazards. Showers slowly transferring north-westwards whilst dying out during the evening.

Chance of cloud-free hill tops above 600m: Generally greater than 95%.

Low Cloud and visibility: Good or very good through most of the day, with uninterrupted panoramic views, but mediocre or even poor under any showers in the late afternoon / early evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Warm or very warm, with very high UV levels and high humidity, so sun protection and extra water highly recommanded. A risk of heavy rain in the west, leading to swollen watercourses and possible flash flooding

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sat 10 Jun 2023	0mm	0mm	0mm

Forecast for Monday 12 Jun 2023

Weather: Remaining very warm with early mist and patchy low cloud in some valleys, followed by large amounts of sunshine. Some showers developing in the afternoon, heavy and slow-moving with a risk of thunder and hail in places.

Maximum wind: Easterly 15mph with gusts 25mph but considerably more under any heavy showers.

Chance of cloud-free hill tops above 600m: Generally greater than 90%.

Low Cloud and visibility: Good or very good through most of the day, with uninterrupted panoramic views, but mediocre or even poor under any showers in the late afternoon / early evening.

Temperature: **Valleys:** Plus 18 becoming plus 29 Celsius.
At 600m: Plus 8 becoming plus 19 Celsius.
Freezing level: Well above peaks.
